

JINGZHONGJING GROUP-GUANGZHOU SHINELY www.gz-btb.com E-mail: info@gz-btb.com

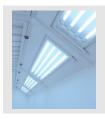

Advantages

LOW NOISE

Cabins with low acoustic emission (<75 dB, 73 dB on average).

LED LIGHTS

Our cabins include high-brightness LED lighting (+1000 lux)

DOUBLE TURBINE

Limits vibrations at start-up and throughout operation,

PANEL DIGITAL HMI TOUCHPAD (optional)

Standard installation of HMI

DOUBLE GLAZING

Double glazing with air chamber prevents heat loss, increasing temperature stability

INSULATED ROOF (optional)

Our cabins have an insulated plenum to prevent heat loss on the roof.

LAMINATED GLASS

Laminated glass throughout

COMPONENTS FROM TOP BRANDS

Frame made entirely with

HIGH MODULARITY

Flexible installations to fit into any space configuration to meet specific customer needs

EUROPEAN STANDARDS

Our products are 100% manufactured according with the CE standards

SPARE PARTS

ensure optimal operation throughout the life of the

SPECIALIZED TECHNICAL SERVICE

BZB own technical and aftersales service.

A. Spray booth <u>BZB-E703</u>, dim. 6,90 x 4,00 x h. 2,65 m

a. Main features

	LENGHT	WIDTH	HEIGHT	
			Outside	Inside
Dimensions	6.900	4.000	3.400 mm	2.650 mm

	3-wings	Width and height of passage	3.000 x h.2.600 mm
Frontal Door	Inspection windows	Shutters supplied with inspection windows and safety glasses	550 × h.1800 mm
	Personnel door	Width and height of passage	800 x 2.000 mm.

	Airflow	24.000 m³/h
	Motor power	2x4 kW
Air Generator Unit	Average air speed into the empty cabin	0,25 m/s
	Inside cabin noise level	<75 dB.73 dB average
	Thermal power	180.000 Kcal/h (200 KW)

Thermal equipment Type	Riello G20
------------------------	------------

Burner consumption	Diesel (gasoil)
Recycling	NO
Max. temp. in drying phase	70°

	Туре	CE Standards – inspection from inside
Lighting	No. of tubes/Lux	 Upper lights: 8 fixtures x 4 pcs = 32 pcs Led lighting Intensity +800 Lux

	Туре	Metal Basement
Floor	Dimensions	6.900 x 4000 x h . 300 mm.
Floor	Loads (Punctual/Distributed)	650 Kg per wheel print
	Filters (Type)	Paint-Stop / EU3

Control Board	Туре	Button type control box. Main circuit has multi-protection. With Light switches, spraying, risen-temperature spraying, baking, baking temperature, time setting, failure indicator, temperature controller, temperature limit controller, emergency stop, breakdown alarm etc.
---------------	------	--

	Fontal Door	Improved construction with no loss
Isolation	Roof	Not isolated plenum
	Panels	With EPS thermal and acoustic insulation

	ELECTRICITY	
Power Requirements	Power	9 kW approx
	Tension	400V-50Hz (3PH+N+PE)

b. Additional information

3-wing front door

1 Unit.

The front door is composed of a steel-tube load bearing chassis, which houses the large central door.

- Door with -wings with perimeter gaskets made of rubber with high neoprene content.
- All the shutters are supplied with inspection windows with safety glasses.
- Locking system consisting of robust steel components with reinforced
- Thermal insulation by EPS.

Service Door

1 Unit.

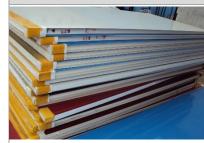

Service door located at side of the cabin.

- Safety lock with overpressure protection.
- Provided with a porthole with safety glass for the inspection.
- Thermal insulation by EPS.
- Anti explosion handle.

Side Walls

1 Unit.

Sandwich panels of 50 mm thick, specifically built by BZB, assembled together by means of a male-female system, without welds or screws, with internal EPS insulation of 50 Kg/m³ density, closed around its perimeter.

- High corrosion resistance.
- Excellent solvent resistance.
- Easy to clean.

Filtering ceiling

1 Unit.

The filtering ceiling is formed by a bearing structure made of a sequence of plane trusses of section bars, in which inside part are mounted the filtering panels, covered with white coloured frames fixed with special Bakelite pommels.

Made of painted galvanized sheet metal with special profiles for a better

The filtering efficiency is 99.8% like the AFI Norms. Heat resistance: until 100/120°C. The filters are self-extinguishing according to DIN 53438 - Class F1 rules.

- Self-extinguishing.
- Saturated with fixing resin dust.

Filter Type

Synthetic fibre / EU5

Lighting

1 Unit.

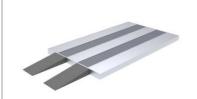

Top lighting located on the ceilings in an inclined position, on both sides of the cabin.

- Removable from the inside of the cabin.
- Composed of hermetic ceilings with LED tubes protected by laminated glass with metal frames and sealing neoprene gaskets. CE standards classified.
- Light tone: high-performance neutral.
- Estimated light intensity: +800lux

Metal Basement with Ramps

1 Unit.

The metal basement (h.300 mm) is endowed with modular panels of electro galvanized grades (two lines grill and three lines checkered plate) forged to industrial sweater in designed to withstand heavy weight equipment with maximum weight to be supported of 650 Kg for wheel print. Besides, there are several undergrates metallic looms in order to close central zones where suction is not provided, with paint-stop filter.

Easy handling and cleaning.

Ventilation unit - INLET

The booth is supplied with 1 power unit, on the side of the cabin, equipped with pre filtering cells. The power unit has a surface structure made of panels with two sheets of galvanized iron filled with rock wool.

This structure bears:

- No.2 motors of 4 kW
- No.2 high efficiency fans, for an airflow of 24.000 m3/h
- Motor and fan transmission through belt and pulley
- no.1 stainless steel heat exchanger made of stainless steel (SUS304), δ=1.2 mm, made of double-layer heat exchange stainless steel tubes of 180.000 Kcal/h (200 kW)
- No.1 electric damper
- With gasoil (diesel) burner

The power unit is equipped with:

- Safety and control thermostat
- Pre-filtering cells inserted on special slides and frames.
- The power unit is supplied with connecting ducts between the power unit and the plenum.

Control board

- CE standard control system, it includes the following components: Ventilation start/stop depending on the work phase to be carried out.
 - Start/stop and temperature programming.
 - Turning lighting on and off.

 - Fault alarms. Ventilation failure.

 - Power failure.
 - Temperature inside the cabin.
 - Hours of service counter.
 - Emergency stop

Documentation to be delivered with the booth:

- User manual, program management guide, description and how to use.
- Electrical diagrams of the system.

B. Quality Standards

The installation of BZB equipment in a large number of countries with strict management and manufacturing regulations guarantees the quality of our products.

Our company has certified its quality management under the requirements of the ISO 9001 standard for design, manufacturing and assembly activities.

In addition, our installations are in general compliance with the following directives:

- Directive 2014/35/EU: Marketing of Electrical Equipment intended for use with certain voltage limits.
- Directive 2014/30/EU: Electromagnetic Compatibility (recast).
- Directive 2006/42/EC: Machinery Directive.
- Directive 2011/65/EU RoHS II (Restriction of Hazardous Substances)

French Regulations:

- Guide ventilation 9.1 (INRS ED839)
- Order of 8 October 1987 (Official Journal of 22/10/1987)
- Order of 3 May 1990

Harmonised technical standards:

- EN 12100: Safety of machinery. General principles for design.
- EN 61000-6-4: Electromagnetic compatibility (EMC). Part 6: Generic Standards. Emission standard in industrial environments.
- EN 61000-6-1: Electromagnetic compatibility (EMC). Part 6: Generic Standards. Immunity in residential, commercial, and light industrial settings.
- EN 60204-11: Safety of machines. Electrical equipment of the machines.

This installation is delivered accompanied:

- Warranty Certificate
- Instruction & Maintenance Manual

BZB offers you an after-sales service that allows you to maintain optimal operation of the facilities throughout their useful life info@gz-btb.com

C. Economic proposal

|--|

Ducts	NOT INCLUDED
Assembly	NOT INCLUDED
Delivery time	3/4 WEEKS FROM THE ORDER CONFIRMATION
Transport	NOT INCLUDED

(TAXES NOT INCLUDED)

Payment Terms:

- 30% at the order confirmation, by bank transfer
- 70% prior to loading of the order at the factory, by bank transfer

D. Warranty and Exclusions

Guarantee: 1 year

Offer Validity: 3 months

BZB guarantees each of the elements described in this offer, including commissioning of the product. However, please pay attention to the following exclusions:

- The execution of the civil works necessary for the proper assembly and operation of the installation to be supplied (air extraction pits, opening and sealing of holes in the roof, façade or walls for the installation of masonry ducts, cleaning and debris removal).
- Air inlet and outlet ducts, and combustion fume ducts; Except as otherwise expressly stated in this offer.
- The complete connections to the respective connection points:
 - Electricity to the machine's control panel, suitably sized and protected with circuit breakers in accordance with BZB specifications.
 - Grounding
 - Natural Gas/Propane (Supply pressure: 100-300mbars)
 - Compressed air (permissible pressure: min.6 max. 8 bar). The customer will be responsible for the filtration, removal of
 oil, water, pressure regulation or any other element necessary for the operation of our equipment.
 - Water (Min. pressure 3 Bar). The customer will be responsible for filtration, descaling, reverse osmosis, ultraviolet or any other purification process necessary for the operation of our equipment.
 - Hot/cold water for hot or cold supply to thermal equipment equipment equipment with water batteries. Each thermal unit is supplied with its corresponding shut-off valves (in which the connection must be made), and regulation valve (2 or 3 ways according to customer specifications), emptying and bleeding valve.
 - Sanitation
- Emission measurement points in accordance with regulations and means necessary for access to the vehicle (stairs, platforms, handrails, etc.)
- The unloading of materials at the installation site, their custody and their protection from the elements.
- Cranes, forklifts, scaffolding and other mechanical means necessary for the unloading of material, assembly work, etc., according to the list that will be sent prior to the start of the assembly work.
- The dismantling of existing installations on the site, except for their inclusion in this technical offer.
- Workers who provide continuous assistance to the BZB technical for the duration of the installation assembly work.
- The installation of any accessory or part of the installation that cannot be carried out in the assembly for reasons due to the state of the work and/or beyond the control of the manufacture.
- All the treatment products, consumables and fluids necessary for the testing, assembly and commissioning of the installation.
- The removal of debris, packaging and excess material.
- The calibration of probes, equipment or instrumentation for regulating the different elements of the cockpit control panel.
- The processing of all the documentation and contracting of the different control bodies necessary for the legalization of the machines.
- Anything else that is not expressly stated in the offer
